General Wholesale Business Terms

ADDRESS -

Please use your business stationery, or SPELL YOUR NAME AND ADDRESS IN PRINT FORM. In that way there will be no danger of mis-sending your order. Your not doing so might cause delay and death to Plants or Fish.
IF POSSIBLE, LET US HAVE YOUR TELEPHONE NUMBER!

TERMS -

CASH WITH ALL ORDERS. On C. O. D. shipments, 25% must accompany order.

!! SPECIAL NOTICE !!

FISH - If ordering less than 6 of a kind, add 3¢ per fish when price quoted is less than 15¢ each. ORDERS FOR FISH AT WHOLESALE MUST EXCEED \$2.00.

PLANTS AND SNAILS -

If ordering less than 6 of a kind, add 2¢ per item if price quoted is less than 10¢ each. PLANT AND SNAIL ORDERS AT WHOLESALE MUST EXCEED \$1.00.

SHIPMENTS -

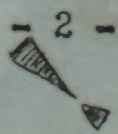

All PRICES ARE F.O.B. TAMPA and go forward VIA EXPRESS. Live delivery guaranteed in the U. S. A.

REPLACEMENTS -

We replace fish and plants only when claim is accompanied by a BAD ORDER REPORT RECEIVED FROM THE RAILWAY EXPRESS AGENT by you and sent to us direct by you. Please EXAMINE SHIPMENT ON ARRIVAL and should there be a loss, GET A BAD ORDER REPORT, stating whether can had been mishandled (dropped, overturned, overheated, or banged around to where the packing surrounding the can is soaking wet and can showing a low water level). In this way you can help us in filing a claim.

WE THEN IN TURN WILL ALWAYS BE GLAD TO REPLACE IN CASE OF A LOSS.

Summer Bargain List

NOTICE

?? DO YOU KNOW THAT ??

NOTICE

S U M M E R - Shipments are liable to be OVERHEATED enroute, because of the can having been allowed to stand out on a hot platform in the direct rays of the sun. This overheated condition can be noticed on the fish on arrival, as they will look "fuzzy". In other words, the heat in the can has been high enough to melt the protective slime from off the fish, which is the same as scalding them. While this does not happen often, it is best always to examine shipments in the presence of the Express delivery man. If they look white and seem to have a scum over them, be sure and get a bad order report, stating "shipment overheated", or if dead "cooked."

FALL AND WINTER

During this chilly and freezing weather, shipments because of neglect by expressmen, are often chilled enroute. This happens from the latter part of August and on. After the latter part of August, always take a thermometer reading and if water is below 70 degrees, be sure and state same on the Bad Order t. This will protect you as well as us.

SUGGESTIONS ON FISH BEFORE AND AFTER ARRIVAL

telephone number with the Express people, with instructions that they call you immediately on arrival of shipment.

- 2nd. Meet the train and take shipment off yourself. This eliminates the danger of a shipment being dragged all over town before it is delivered to you. Such trucking is dangerous to shipments, in Hot or Cold weather.
- 3rd. On arrival home have a few clean aquariums ready with seasoned water for the new arrivals (they should not be put with your other fish for at least two or three days). Strain our water from out of cans, putting as much as possible into your waiting aquariums. Float our fish in jars in the new aquariums, so that the temperature in jar equalizes with that in the aquarium. It is also best to add a little salt to the aquarium water, say about four level tea-spoonfuls to every twenty (20) Gallons. This acts as a tonic.

FOR FURTHER INSTRUCTIONS ON TROPICAL FISH, PLEASE GET BOOKS ON THE SUBJECT FROM YOUR LOCAL LIBRARY OR WRITE US AND WE CAN ORDER THEM FOR YOU.

Charges for Shipping Cans.

SHIPPING CANS -

Our shipping department is endeavoring at all times to deliver to you live healthy specimens. We use our best judgment on, as to how many fish will ship safely in a can in Summer or in specially packed cans in the Winter.

1 GAL. AMERICAN CAN (Carry one to three pair of small size fish)
NOT RETURNABLE \$.15 EACH

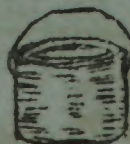

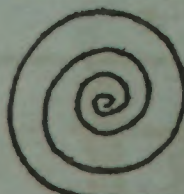

LARGE SPECIALLY TREATED 5 GAL. AMERICAN CAN (Carry from 10 to 35 Medium size fish)

NOT RETURNABLE

CANS BEING RETURNED FOR CREDIT, MUST BE PREPAID. THIS COSTS YOU ONLY 20¢ AS A "returned empty can" BY RAILWAY EXPRESS.

AQUARIUM PLANTS HOW TO HANDLE ON ARRIVAL

ROOTED PLANTS

On receipt of your plants, we suggest that all plants having roots, such as Sagittarias, Vallisnerias, Spatterdocks, etc., be planted up in your aquariums, planting them so that they will show off to their best advantage. This draws the attention of the buying public. It is not good to let them lay around on top of the water, as this causes them to spoil in shape and even rot.

BUNCH PLANTS

It is best to keep these in an aquarium or vat with running water, or allow for plenty of room during hot weather. This keeps plants in good condition for a long time. Should your sales be small on bunch plants, we suggest that you separate the bunches and plant up the strands in your aquariums. These will then take root and stay in good condition until sold.

FLOATING PLANTS

Even though they have roots, (such as Salvinia, Floating Valentines, Hyacinths, Water Lettuce, Floating Water Fern, etc.) they should be allowed to float and not planted.

!!! LIGHT !!!

One of the greatest causes of plant spoilage, is lack of sunlight and crowding. With a few exceptions, all Aquarium Plants require at least three to five hours of sun per day, or the equivalent in strong electric light over the aquarium. Plants not given sun usually deteriorate.

Light is also necessary for most Fish, as many varieties of Tropical Fish get the disease called "Rickots", this because aquariums are kept in places where no sunlight reaches them. Under such conditions they soon get a caved in look and do not last long.

TROPICAL AND SEMI-TROPICAL FISH

PANCHAX, RIVULUS, FUNDULUS, GOBIES,
AND RARE SUNFISH CONT'D.

	EACH		EACH
RIVULUS HARTII - Colorful fish from Trinidad. Body a Pinkish tinge with Red dots throughout, males showing signs of a Lyre - - - -	\$.14	"ZEBRA FUNDULUS" NOTTI - A very Odd striped and beautiful Florida aquarium fish. Males with beautiful Red cheeks and checker-board bodies of bars and stripes - Surprise yourself with their beauty. GET SOME! - - - -	\$.14
RIVULUS CYLINDRACEUS - Very popular Blue-Green Rivulus from Cuba. Does not hide and is always at the front of the aquarium - - - -	.14	"AMERICAN FLAG FISH" (Jordanella floridae) Beautiful and highly colored fish whose markings remind you of the American Flag. Something like Dwarf Gourami, but even more highly colored - - - -	.15
APLOCHEILUS LATIPES - The Deep Orange variety - Our own color breeding and very different from the original Japanese fish. These are of a beautiful Deep Orange shade, and breed true. See Innes New book which describes this New Deep Orange variety - Breeders.	.14	RARE ALWAYS RARE	
FUNDULUS MULTICOLOR - Most sought after of the Fundulus family - Males and females are beautifully blotched in Blues, Reds, Black and Green, with an underneath coloring of a Brassy shoen - Colorful show specimens - - - -	.45	★ "BLACK BANDED SUNFISH" (Mesogonistius CHAETODON) ★	
Younger Specimens - - - -	.18	The Most Beautiful Sunfish known. If you can imagine a cross between the aristocratic Angel Fish and the poppy Barbus Sumatranus, you will have an idea of the grace and beauty that this Dwarf Sunfish has. PEACEFUL	
		Can live in temperatures which are considered too low for Tropicals.	
		PRETTY YOUNG SPECIMENS - - - -	.18

"LACE FIN CICHLID"

"BLACK BANDED

SUNFISH"

"CHAETODON"

CICHLIDS ETC.

	EACH		EACH
AEQUIDENS MARONII - "Peacock" Dwarf Peaceful Cichlid - A description of this RARE fish can be found in the May 1936 issue of "The Aquarium Magazine."		"GOLDEN CICHLID" (Cichlasoma Friedrichsthalii) - Our own importation from La Ceiba - Peaceful - Good parents and very pretty - Young Specimens - - - -	\$.15
PER PAIR \$2.50		ANGEL FISH (Scalare) AMERICAN GROWN STOCK - PEACEFUL -	
*"JEWEL FISH" - Red Chromide from Africa - Very popular and beautiful - YOUNG BREEDING PAIRS 50¢		Medium size Healthy Specimens - -	.22
Cichlasoma Meeki - Beautiful "Fire Mouth" and Red Throat Cichlid. Peaceful - Breeders \$1.50 PAIR		Size of Half Dollar - - - -	.35
Young Specimens - Good color - -	.20	Size of Silver Dollar - - - -	.60
"Lace Fin Cichlid" - New Aequidens Specie - From French Guiana - Has beautiful flowing fins and snub nose - Very Peaceful -		GUARANTEED LARGE MATED BREEDERS - \$10.00 PER PAIR	
Young Specimens - - - -	.20	Egyptian "Mouth Breeders" - Dwarf Haplochromis Multicolor - Have interesting breeding habits, female carries eggs and young in her mouth until they are able to take care of themselves. PER PAIR 75¢	
*Cichlasoma cutteri - The "Convict Cichlid" - Very attractive - MATED BREEDERS 50¢ PAIR		Orange Chromide (Etroplus maculatus) Very highly colored Cichlid from India - Remind you of Coral Reef fishes, because of their beautiful colors - BREEDERS PER PAIR \$1.75	
Young - Good size - - - -	.20	Younger Colorful Specimens - - - -	.40
*"KONGO" - The "Christmas Cichlid" - Females showing beautiful tinsel Christmas tree colors - The most beautiful of the Cichlasoma family - - - PER PAIR 50¢			
Colorful Young - - - -	.15		

CICHLIDS marked with (*) should be kept to themselves. During breeding time they are apt to be mean and attack other fish in the aquarium, in their zeal to protect their eggs and young. When kept to themselves they show better color and with their young, are a sight to be long remembered. Young of these fish are Peaceful until full grown.

TROPICAL AND SEMI-TROPICAL FISH

SCAVENGERS

EACH		EACH
